Subject: M&B - Next Monthly Progress Meeting

Cathy,

We should talk sometime soon about this matter - the McCormick & Baxter Superfund Site. It's a fund-lead cleanup in Portland, Oregon but the state is the lead on the project. The soil cap is currently being designed. I spoke with the project manager, Kevin Parrett, last fall about the fact that RCRA is an ARAR for purposes of the soil cap. The background is that long ago, before the company went through bankruptcy liquidation, the State of Oregon entered into a stipulated order with the company in which the State made findings that illegal disposal of listed and characteristic hazardous waste had occurred at the facility. The bottom line is that Kevin indicated that the opportunity to ensure that the soil cap meets the RCRA ARAR would be at this stage - as the design criteria are prepared for the cap, and as the design evolves. I am hoping that you have some time to provide input on this matter to help ensure that the cap meets the appropriate RCRA standard. Please let me know.

I am copying Peter Contreras on this message since he is the new project manager for EPA for this matter. Perhaps the three of us should get together and talk about the issue soon.

Thanks.
-Jennifer

Subject: M&B - Next Monthly Progress Meeting

Greetings,

Attached is the agenda and teleconference information for the next Monthly Progress Meeting on the McCormick & Baxter Superfund Site. The meeting is scheduled for Tuesday, February 10 from 11am to 3pm at DEQ's NW Regional Office, Room E.

One of the focus items for this meeting will be the Design Criteria Report for the upland soil cap. This report will identify the various criteria for which the cap will be designed. The report will be summarized including the design criteria addressing future use of the property. DEQ will be seeking input on this report from the Project Team members, Trustees, Tribes, City of Portland and other interested parties.

At a previous monthly meeting several folks asked me to make available the PowerPoint presentation on Dredging that I gave to DEQ and EPA management in November 2003. I will go through this presentation from 10am to 11am on Tuesday for those interested (same AT&T teleconference information). The PowerPoint presentation is too large to email, however, it can be downloaded from Ecology & Environment's ftp internet site as John Montgomery discusses in the attached email. Please let me know by 9am Tuesday if you intend to sit through the Dredging presentation.

I look forward to seeing (or hearing from) you at Tuesday's meeting.

Kevin

Subject: M&B - ftp site access

M&B Project Team:

For the monthly status meetings, Ecology & Environment, Inc., is providing an "ftp" internet site that we will populate with the meeting presentations and other related documents. For all presenters, the deadline for loading your presentation to the site will be the preceding Friday (that is this coming Friday for next Tuesday's meeting). This should give team members some time to copy/paste the presentations, and briefly review them before the Tuesday meeting.

Today, we have added the 2002 Sediment Sampling Report and Comment/Response table the FTP site. The report incorporates all comment responses and includes all text, tables, figures, and appendices, including analytical data packages.

Because of the large size of this document, we broke the document into pieces for copying. The figures folder and some of the appendices are rather large PDF files. We encourage you to copy and paste these files to your computer for review and printing rather than opening these files while in the FTP site. The large PDF files will take several minutes to open from this site.

Throughout this week we will be adding several other documents and information, and will send an e-mail out as the documents are added to the site.

If you are having problems with large file downloads, please call us in the Portland office and we can try to get you these files in another manner. See also the troubleshooting tips at the bottom of this message.

We plan on leaving these files on the site for one month, then we will remove them from the site and archive them in the Portland office.

For all team members, the instructions for accessing the ftp site are as follows:

1) Open Internet Explorer and type [REDACTED]
click on the link

2) Enter your credentials in the following manner:

Username: [REDACTED]

Password: [REDACTED]

3) Copy and Paste the files in this ftp site to your computer

If you don't have any luck, try the following:

> I'd like to try the following options on ftp.

>

> 1) Open Internet Explorer --> Tools --> Internet Options

> 2) Select the 'Advanced Tab'

> 3) Make sure that the following two items are selected:

>

> 1) Enable Folder View on FTP sites

> 2) Use Passive FTP

>

> Let me know if that works. If not, please let me know what FTP software you

> have. You should be able to configure it in this manner:

>

> Host: [REDACTED]

> Directory: [REDACTED]

> Username: [REDACTED]

> Password: [REDACTED]

>

> There may be some additional settings that may need to be fixed depending on

> the software that you have.

>
